

## IMMUNIZATIONS

### - POLICY -

Immunization is not mandatory in BC. However, it is strongly recommended that students (and adults) are up-to-date with their immunizations. Students who attend our schools should be immunized against:

- diphtheria
- tetanus
- polio
- measles
- mumps
- rubella
- meningitis (meningococcal disease)
- whooping cough (pertussis)
- chickenpox (varicella)

It is understood that some individuals have a valid medical reason not to receive immunizations.
