

COURSE CHALLENGE

- POLICY -

The Board of Education will comply with Ministerial directives and guidelines regarding course challenge and believes that granting credit for prior learning is an appropriate method of permitting students to develop to their maximum potential as expressed in the Board's mission statement.

Course Challenge

The purpose of the challenge portion of this policy and the attached regulation is to acknowledge, within parameters, learning which students have accomplished in other settings which corresponds to grade 10, 11 and 12 courses currently being offered in the district. A successful challenge results in a student receiving course credit for the appropriate content and a final mark which is recorded on the student's transcript.

Although all students are entitled to challenge courses, challenging is a rigorous process and it is anticipated that only small numbers of students will be able to give strong and compelling evidence that it is in their best interests to attempt to challenge a course and that they will succeed. Challenge is not envisioned as a method for students to improve their course marks, nor as a replacement for the valuable experience students gain from learning in a classroom setting.

The underlying principles of challenge are that students learn in a variety of ways and at different rates and that their diverse needs and abilities should be acknowledged by providing opportunities to obtain credit for relevant learning. Students must demonstrate that they have met the learning outcomes for the course being challenged, and the process should maintain the high standards of a quality education.
